TECHNICAL SKILLS

Python · Odoo XML-RPC
Next.js · TypeScript
FastAPI · REST APIs
PostgreSQL · SQL
Docker · Kubernetes
Git · CI/CD
XML · OCA Modules

SOFT SKILLS

Product thinking Technical leadership
Stakeholder mgmt Requirements capture
Cross-cultural work
Delivery under pressure Fast learning

Technical Lead with **5+ years of Odoo expertise** and a strong product mindset. I combine deep ERP domain knowledge with full-stack development and product strategy — designing solutions that translate real business needs into scalable software. Currently leading the design and development of a **client-facing SaaS platform** built on top of Odoo infrastructure, covering architecture, UX, backend and go-to-market thinking. I leverage **AI agentic workflows** (Claude Code) as a technical force multiplier — executing at the scope of a full engineering team while maintaining product vision and delivery quality.

AI-augmented engineering

Experienced directing **Claude Code & agentic workflows** as a force multiplier — executing at the scope of a full engineering team solo, combining ERP domain expertise with AI orchestration.

2025 · Active

WORK EXPERIENCE

IPGrup Innovatec

May 2025 – Present

Odoo Technical Lead & Product Engineer

- Designed and built from scratch a **SaaS** multi-tenant client portal (Next.js 14 + FastAPI + PostgreSQL + Redis) on top of Odoo data via XML-RPC
- Architected the full product: per-client branding, real-time KPIs, project timeline, proactive proposal engine and K8s infrastructure packaging
- Defined the business model: subscription tiers, MRR projections and go-to-market positioning for the Odoo consultancy market
- Leading Odoo technical projects end-to-end: estimation, developer coordination, client workshops and delivery standards
- Deployed containerised infrastructure with Docker Compose (local) → Kubernetes (production-ready)

Dynapps

Mar 2024 – May 2025

Odoo Technical Consultant

- Executed technical Odoo developments within a **structured team of 10+** including PM, Tech Lead and Business Lead — operating with high professional standards and clear delivery processes
- Worked from detailed functional specifications: class diagrams, field definitions, translations and UX flows provided by the functional layer
- Delivered custom modules with full documentation, peer code review and CI/CD pipeline compliance
- Daily professional work in English within a fully international environment (Belgium)

CactusSoft

Mar 2024 – May 2025

Odoo Expert

- OCA modules implementation and upgrade in a fully remote international environment
- High autonomy and self-organisation working cross-culturally · JIRA & Confluence

EDUCATION

Universidad Autónoma de Barcelona
Computer Engineering — Software Dev
2017 - 2022

Institut Montserrat Roig, Terrassa
Bachelor's degree in Technology
2015 - 2017

ACCREDITATIONS

LinkedIn Learning · Leadership with emotional intelligence

LinkedIn Learning · Business English — lead the conversation

OTHER

Final Degree Project
Odoo implementation in an educational center · Grade 8.75/10

WORK EXPERIENCE (CONT.)

QubiQ SL 2010

Nov 2023 — Mar 2024

Odoo Tech Lead

- Daily GitHub management: branch creation, merging, cherry-picks, CI/CD deploys
- Back-end and front-end development planning and delivery
- Direct client contact and requirements capture using SCRUM methodology

QubiQ SL 2010

Apr 2021 — Nov 2023

Odoo Technical Consultant

- Advanced Odoo development — grew from intern to mid-level in 18 months
- First client-facing experience: requirements design and solution delivery

Mercadona

Oct 2019 — Apr 2021

Store Manager (Gerente A)

- Team leadership, customer management and operations under high-pressure environments

TECH STACK

Python · Odoo XML-RPC	Next.js 14 · TypeScript
FastAPI · SQLAlchemy	PostgreSQL · Redis
Docker · Kubernetes	Git · GitHub · GitLab CI
Linux (Ubuntu/Debian)	JIRA · Confluence · Scrum
REST APIs · Postman	XML · OCA Modules

AI & AGENTIC WORKFLOWS

Experienced working with **LLM-powered development tools** (Claude Code, Claude Agents) as a technical force multiplier — decomposing complex product problems, directing agentic workflows and integrating AI into the full development lifecycle. Able to lead solo the scope of a multi-person team (frontend, backend, architecture, product) by combining domain expertise with effective AI orchestration.

Claude Code · Claude Agents	Prompt engineering (technical)
Agentic workflow design	AI-assisted architecture
